SUMMARY

Full-stack developer with 10+ years of experience crafting scalable, high-performance web applications in Laravel and modern JavaScript frameworks. Adept at API design, legacy upgrades, and building maintainable, modular systems. Background spans healthcare, fintech, real estate, and commission-based platforms. Currently deepening expertise in Vue 3, Inertia.js, and Tailwind CSS, and expanding frontend capabilities with TypeScript. Known for clean code, pragmatic problem-solving, and mentoring team members to elevate quality and delivery.

EXPERIENCE

Scopic Software, LLC. — Full-stack Developer (Contract)

Marlborough, MA | May 2021 - Present

- Collaborated with cross-functional, multinational teams to deliver full-stack applications spanning healthcare, real estate, laboratory systems, orthodontics, and fintech platforms.
- Contributed to a ReactJS/Laravel orthodontic platform by upgrading Laravel v7 to v11, integrating the Relu AI engine, building reusable components, backend APIs, and partner-facing endpoints. Ensured backend quality with unit and feature tests using PHPUnit.
- Built a real estate listing platform (PHP/WordPress) with dynamic search, lead automation, and API integration with YouGotListings.
- Delivered fintech investor portal features in Laravel, including email and messaging modules, KYC via Acuant, and retry-enabled asset APIs. Wrote unit tests and resolved merge conflicts to stabilize deployments.
- Utilized Windsurf Editor, an AI-powered IDE, to speed up prototyping and streamline development workflows in recent projects.

Naxum Online Marketing Services, LLC. — Full-stack Developer (Full-time)

Houston, Texas | Dec 2018 - May 2021

- Maintained and enhanced commission engines across 15+ MLM platforms, ensuring stability and adaptability for varied compensation models.
- Refactored scripts and tuned SQL queries to improve performance for ranking, reward, and commission calculations.
- Secured backend communication by introducing authentication between Perl scripts and the PHP-based commission engine.
- Migrated the base commission engine from Slim 2 to Laravel, improving long-term maintainability.

- Designed a PHP adapter interface to enable modular payout integration with ACH, Hyperwallet, and PayQuicker.
- Analyzed client compensation plans and translated them into detailed user stories for the development team.
- Mentored team members by assisting with commission logic implementation and supporting them in overcoming complex development challenges.

Kinetique Systems Inc. — Software Developer (Full-time)

Davao City, Philippines | May 2015 - Nov 2018

- Collaborated in a nine-person team to build and maintain 10+ business applications using .NET and PHP technologies.
- Delivered features and fixed bugs while adhering to best practices in version control, peer reviews, and delivery timelines.
- Mentored interns on programming fundamentals, coding best practices, and debugging techniques as part of their hands-on learning.

OSG Marketing Inc. — Back-end Developer (Part-time)

Brampton, Ontario | Jun 2018 - Aug 2018

- Customized and maintained 4+ WordPress websites while contracted through Kinetique Systems Inc.
- Extended WooCommerce plugins to integrate e-xact.com as a secure payment gateway.

Kinetique Systems Inc. — OJT

Davao City, Philippines | Sep 2014 - Feb 2015

- Supported development teams by debugging, optimizing code, and improving performance across ongoing projects during internship training.
